# Riverside Water Authority

## Quarterly Report – Third Quarter 2026

This is a fictional document, written to test the source-check skill.
Every number in it is made up.

## 1. Demand

Average daily demand was 41.2 million gallons in September 2026, seasonally adjusted, up from 39.8 million gallons in August. Before seasonal adjustment, September demand was 42.9 million gallons. Most of the increase came from the residential and industrial classes (Table 2).

## 2. Rates and outlook

The Board left the base rate at $4.15 per 1,000 gallons.

“We expect no rate change before the spring review,” said Director Ana Ruiz.

The Authority does not publish demand forecasts in this report.

Table 2. Water use by customer class, million gallons per day

| | Seasonally adjusted | | Not seasonally adjusted |
|---|---|---|---|
| Customer class | Aug. 2026 | Sept. 2026 | Sept. 2026 |
| Residential | 22.4 | 22.9 | 24.1 |
| Commercial | 11.0 | 11.3 | 12.0 |
| Industrial | 6.4 | 7.0 | 6.8 |
| Total | 39.8 | 41.2 | 42.9 |

Figures for September are preliminary.
